

CEO' Message on Teachers' Day

The World Order is changing and the future is unknown. Volatility, uncertainty and complexity are on the rise, and knowledge obsolescence is rising alarmingly. Artificial Intelligence and climate change are already imparting the future of jobs and our planet. In such a scenario, it is not possible to make any prediction; preparations are the answer.

Teachers, must therefore, re-role themselves to **teach the child and not the subject alone**. You must therefore, develop a **creative mindset** to remain relevant. Schools must give higher priority to **self-growth** over professional development.
