

CEO's Message July 2025

In a world of uncertainty and rapid change, our children need more than academic success – **they need choices**. That's why **every Indus and 10X School now has a Life Entrepreneurship Department** to nurture creativity, human values, and purpose. With an **Incubation Centre** coming up in the Bangalore Campus, we're enabling students to build startups, file patents, and shape their own futures. This initiative goes beyond individual growth, when students create venture driven by innovation and social purpose, they generate employment, solve real-world problems, and strengthen the country's economic and intellectual capital. This is how we reimagine education – to help every child not just succeed, but create the future they dream of, and serve the greater good.
