

CEO's Message October 2025

Dear Parents and Teachers,

To succeed in an AI-driven volatile, uncertain, complex, and ambiguous world, it is imperative that, on graduation from school and college, our students are part of an **AI-workforce**.

To lead in the AI era, we encourage all children to have a **higher purpose**, that is a guiding light in times of chaos and uncertainty.

Our curriculum emphasizes unique human skills that complement machine-collaboration, design thinking, and the collaboration learning model – **teacher x student x humanoids**.

We are committed to securing a purposeful and successful future for every Indus student.
